Rotator Type: _____

Controller Type: _____

Describe Problem:

DELIVERY OPTIONS: (Choose One)

PICK UP AT SHOP: _____ SHIP BACK: _____

SHIPPING INFORMATION

When shipping either a rotator or controller or both for servicing, fill out this form, making sure that you give me a phone number or email for contacting you. Place it in the well packed shipping box with your serviceable parts. Use packing peanuts.

When packing a rotator with a controller, place the controller in a separate box in with the rotator. Or send in a separate box

When packing a controller, be very careful with the plastic power switch, as it is very likely to snap off at the base during shipping. So pack extra support around it and the metering face to avoid a very costly repair.

FOR RK RADIO Electronics USE ONLY
